

At Australian Tan, our luxurious salons and certified tanning professionals will provide you with the highest quality of service and premium skincare that will surely exceed your expectations. We offer 5 levels of state of the art tanning equipment and Sunless Tanning. You'll find the relaxation you need at Australian Tan, with multiple locations all linked together and over 100+ tanning beds it's the perfect fifteen minute getaway, close to home.

Fast Tanning Bed

The Fast tanning bed is our introductory standard tanning bed. The Fast bed is well suited for tanners on a budget who want a fast way to build their base tan. Although the Fast beds may not be as powerful or quick on results as some of our more advanced equipment, they do boast extremely high-quality, carefully selected tanning lamps to get the job done right.

Our Fast beds are used in 20-minute sessions, with some locations offering a 10-minute "speed" version for clients in a hurry

- ❖ **20 minute tanning time**
- ❖ **Introductory standard bed**
- ❖ **Fast way to build a base tan**

Faster Tanning Bed

The Faster tanning bed is a slightly higher intensity tanning bed; it's about two to three times stronger than the Fast bed. This higher intensity makes sessions slightly shorter than those of the Fast bed (15 minutes instead of 20) and helps you reach your final results a little more quickly. The Faster bed also means less exposure to reddening UVB rays for a more golden tan than the Fast bed usually delivers.

Overall, the Faster bed is a great option for a rich, uniform base tan with a faster turnaround time for results.

- ❖ **15 minute tanning time**
- ❖ **2-3 times stronger than the fast bed**
- ❖ **High pressure facial lamps**

Fastest Tanning Bed

The Fastest tanning bed is a higher intensity than the Fast or Faster beds; in fact, it is three to five times stronger than the Fast bed. At 12 minutes each, sessions in the Fastest bed are much shorter and deliver results three to five times sooner. Tanners using the Fastest bed can achieve a solid base tan in as few as four sessions and they can maintain their tans with only one or two sessions a week.

In addition to extremely fast results, the main factor that sets the Fastest bed apart from the other equipment at Australian Tan is the unique blend of light waves that this bed emits.

Additionally, all of the Fastest beds are equipped with several upscale features: a high pressure facial tanner, shoulder tanners, and full-body 160-watt reflector lamps—all of which work together to provide the most even tan possible. The Fastest beds also are equipped with self-contained air conditioning to keep you cool as you tan. This bed also comes in a stand-up version to help tan those pressure points you get when laying in the beds.

Overall, the Fastest beds are among the most popular units in Australian Tan's tanning salons for the unique set of features and characteristics that they offer. Many of our clients have called the Fastest bed "the best of both worlds." We know that you will be satisfied, too.

- ❖ **12 minute tanning time**
- ❖ **Stand UP or lay down beds available**
- ❖ **3-5 times stronger than the fast bed**
- ❖ **Facial tanners, shoulder tanners and full body reflector lamps**
